

Introducing

BLOND bass cabs

& the new **Studio Bass15** speaker cabinet

old school sound
unrivalled performance

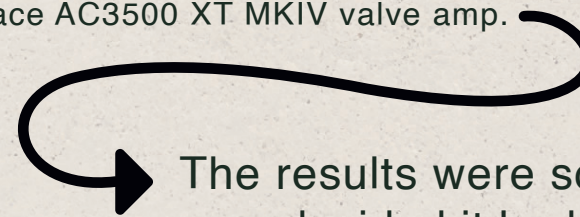

Premium studio bass cab built by hand in Stroud, Gloucestershire.

With its oiled, natural wood finish, and Eminence Legend CB158 driver, the BLOND SB15 is a no nonsense, solid, and dependable piece of kit.

Featuring:

- ▶ The classic Eminence Legend CB158 300w rms
- ▶ 8ohm ferric driver / copper coil / paper cone
- ▶ Neutrik ¼" jack input / shielded cable
- ▶ 2 x 4" tuned ports
- ▶ 21mm/15ply European oiled birch ply throughout
- ▶ Non-marking castors and sprung flip handles
- ▶ Offset internal cross bracing

Originally created as a bespoke commission for Simon Edwards, designed to pair with his 1970's hand wired Wallace AC3500 XT MKIV valve amp.

The results were so damn good we decided it had to be shared

ACCURACY, WARMTH, RICHNESS and PUNCH
Order yours today, email Gavin: info@blondbasscabs.co.uk

Created for professional use, we have put our cab against leading brands, as well as boutique manufacturers, and the SB15 simply out performs everything!

Key to the SB15's desirability is the speakers responsiveness to precise tweaks on the amp and instrument. Adjustments are faithfully delivered, speeding up production time and making the BLOND SB15 the players, engineers and producers bass cab of choice.

Perfect for direct miking, perfect for re-amping, perfect for live, the BLOND SB15 offers unrivalled precision and clarity. With a tight focused sound it delivers everything from the speaker, and everything from your chosen amp, bass and upright. (Guitars sound pretty darn good as well).

We guarantee that your kit will not sound better.

In the unlikely event that our cab does not live up to your exacting standards for whatever reason we will take it back and refund you all your money, no questions, no problem.*
